Good Evening to Mrs. Jones & Mrs. Holmgren's class:

We are reaching out to you today regarding a positive COVID-19 case. We have been notified that a 3rd grade student in Mrs. Jones' class has tested positive. There is also a sibling in Mrs. Holmgren's 1st grade class, but their test results came back negative. The family will be under quarantine for 14 days, and both students will attend class virtually during this time. The student who tested positive was last in the building on Thursday, November 5.

We are reaching out to the families with students in both of these classes, so that you are aware and so you can make the best decision for your family. You may continue to send your students to school, or you may choose to have them attend virtually if you are feeling uncomfortable. Per our policy, if your child is exhibiting any symptoms, we would encourage you to keep them home please.

Due to the procedures we already have in place, and the precautions exercised by this family, we are confident that there is no need for other students or staff to quarantine at this time. These procedures include frequent hand-washing and hand sanitization, limited interactions with other students and staff with 6+ feet social distancing for less than 15 minutes, and mask wearing in common spaces. We will partner with the Health Department as instructed when they contact us.

It is our goal and desire to continue to communicate with the Parkway Community in the best way possible. In doing so, we are following the [MDHHS Reporting Expectations of COVID-19 at Schools](#).

As always, we covet your prayers as we continue to navigate these challenging times.

In Christ,

Parkway Administration
